ABOUT US

- Launched by collaboration among an Australian expert of fintech compliance practitioner, a group of Indonesian micro-financing entity practitioners, an Indonesian cryptocurrency influencer and a blockchain specialist IT consultant.
 - The micro-financing blockchain is a solution to answer the collaboration problem among micro-financing entities to move around the financing fund with high visibility, trust, reliability and speed.
 - Supported by SPLASHMINER community to provide the blockchain transactions using PoS methodology.
- 

OUR TEAMS

Building a successful team is about more than finding a group of people with the right mix of professional skills. Alone, we can do so little; together, we can do so much.

Yoga Adipraja

An Australian FinTech compliance practitioner. He has advocated projects on an international scale, as well as leading professional teams in various countries.

Thendy Susanto

A business development professionals and micro-finance practitioner to evaluate and unlock the potential growth of the blockchain network

Bayu Aji

A blockchain influencer who has an outstanding profile among the Indonesian blockchain community member.

ROAD MAP

- ❑ **April 2020** : A group of local micro-financing entities came forward with funding collaboration problem
- ❑ **May 2020** : A solution task force was founded to provide solutions
- ❑ **June 2020** : SPLASH blockchain solution development and legislation compliance framework commenced
- ❑ **July 2020** :
 - SPLASHMINER (www.splashminer.com) infrastructure and SPLASH blockchain
 - (www.splashblockchain.com) infrastructure launched.
 - Pre-ICO started - USD\$ 0.70 per coin.
 - Real micro-financing project pipelines commenced.
 - Coin listing application to exchangers commenced.
- ❑ **August 2020** :
 - SPLASHCOIN (aka LASH coin) are listed at 2 non Indonesian exchangers.
 - First, 10,000 prospective members with registered expression of interest can start to purchase the coin - USD\$ 0.80 per coin.
 - Second, non-registered prospective members can start to purchase the coin - USD\$ 0.90 per coin.
 - Real micro-financing program (up to USD\$ 500,000 per day) commences.
 - Real micro-financing blockchain network up to 10 entities commences.
- ❑ **September 2020** :
 - Micro-community ecommerce for LASH coin development commences.
 - Roll out the SPLASHblockchain to micro-financing entities for Indonesian Eastern Provinces commences (50 entities per week).
 - Micro-community Venture Capitalist (VC) network commences.
- ❑ **October 2020 on wards**:
 - Coin listing application to the biggest Indonesian exchanger (Indodax) commences.
 - Roll out the SPLASHblockchain to the rest of micro-financing entities (100,000 on the list).
 - Min coin price (USD\$ 1) vs inflation rate stability framework commences.

ICO PROGRESS PROFILE

The **ICO (Initial Coin Offering)** chart shows the strong buying commitment from the micro-financing community

- Strong 100,000 prospective micro-financing entities network.
- Supported by strong sophisticated local crypto community (10,000 expression of interest).

THE WORLD'S LEADING PLATFORM FOR MICRO-FINANCING BLOCKCHAIN NETWORK
Supporting each other for an effective micro-financing lifecycle

BUSINESS SUPPORT

Roll out : Micro-financing blockchain network, start by 10 entities per week, then will be increased as required to cover the total 100,000 prospective entities.

To be developed : Micro-community e-commerce platform.

MoU in progress :

Micro-financing
program up to USD\$
300,000 per day
programme

Commodity
micro-financing
program up to
USD\$ 100,000

Micro-financing Venture
Capitalist (VC) up to USD\$
200,000

TECHNICAL INFORMATION

DEVELOPMENT

Splash Coin is based on PoW and PoS using Scrypt and X11 algorithm. At this stage, SplashCoin is no longer in PoW phase. In this advanced digital era, most of the cryptocurrencies are being mined by super-fast computers that use PoW consensus algorithms, but many cryptocurrencies have been migrated to use the PoS method because of using PoS method can be more efficient and eco-friendly. Moreover, crypto currency community common understanding is that Proof-of-Stake has yet to prove its security, economic value, and overall energy efficiency over time.

SplashCoin used PoW to generate premine initially. Then, PoS for transaction processing.

SECURITY

The most secure way to perform a Proof of Stake system is by having as many nodes online as possible. The more nodes that are staking, the less possibility for security issues like 51% attacks, and the faster the actual network will perform transactions through these nodes.

PROOF OF STAKE (POS)

SplashCoin is using Proof of Stake (PoS) concept that states a person can mine or validate a block transactions, based on the coins that the miner holds and coin age. This means that the more Splash Coin owned by a miner, the more mining power the miner have.

- Using Proof of Stake (POS), SplashCoin miners can mine or validate block transactions based on the amount of Coin a miner holds.
- Proof of Stake (POS) was created as an alternative to Proof of Work (POW), which is the original consensus algorithm in Blockchain technology, used to confirm transactions and add new blocks to the chain.
- Using PoS, the block can be generated faster, and the transactions can be validated quicker by the network.

TECHNICAL INFORMATION

WHY USE PROOF OF STAKE (POS) ?

Proof of Stake (PoS) gives mining power based on the percentage of coins that miner held, and no need to use huge resources. So, it will be more efficient and eco-friendly, and PoS can generate the block faster and transactions can be more quickly validated by the network than using PoW .Proof of Work (PoW) requires huge amount of energy and resources, with miners needing to sell their coins to pay the bill.

PREMINE

For premine,Splash Coin owns 2 Billions of premined coins and we will use that premine to fill the market needs

COIN GENERATION

Average blocks will be generated over every 30 seconds. The coin is considered valid and can be used for transaction if it has reached 10 blocks, and staking coin must reach 510 blocks to be acknowledged as a mature coin.

MINING REWARD

Miners have opportunity to earn up to 180% profit per year. That profit is gained from the mining results that keeps going on for a year. The profit will vary between miners, because it depends on each miners' balance and coin age that miners have.
